

I wish to express my opposition to Broadband over Powerline (BPL). As a licensee of the Amateur Radio Service, this will profoundly affect the Amateur Radio Service's High Frequency (HF) allocations. These allocations are used by dedicated Amateur Radio volunteers to provide emergency communications during disasters when Amateur Radio is often the only means of communication to the outside world in these disaster situations. Please see the sound scientific data from the American Radio Relay League (www.arrl.org) on this subject. Thank you for your consideration.
